Daniel Faria
FULLSTACK JS DEVELOPER

ABOUT

I'm a brazilian developer who loves the React tech stack.

This year I decided to change profession, I am currently looking to land my first job as a developer.

I am available for full-time remote or in place jobs.

I'm like to develop code that others can read. As soon as I started coding some bigger projects I learned the importance of writing legible code, and that lesson I carry for life!

EDUCATION

Centro Interescolar de Línguas de Brasília
English Proficiency
2007-2012

It was a 6-year course where I studied during and after the school years.
I've never stoped studying the language, I'm used to talking, reading and writing in English.

EXPERIENCE

Matering React
codewithmosh.com
April 2019 - April 2019

Mosh Hamedani's course was my first contact with React, prior to that I didn't know the power of Javascript.
In this course I learned the structure of React components, functional components but didn't master it until I got into Rocketseat's Bootcamp.

Rocketseat Bootcamp 8.0
React Tech Stack
August 2019 - October 2019

Very practical course about the entire React tech stack.
Built RESTful api's and consumed them both on React.js and React Native.

This was when I got confident about my skills with React.
